

Eyaru Dahabiya features

During building, Eyaru's designer ensured that each cabin is unique, with a unique look, such as the colors of the cabins, yet all are connected to the meaning of the word Eyaru. Papyrus plants, lotus flowers, palms, and banana trees appear in the inscriptions behind the bed, bedspread coverings, and pillows, representing ancient Egyptian culture and the landscape of southern Egypt. Eyaru is created entirely by hand and contains no plastic.

- The length of the cruise is 50 meters.
- The width of the cruise is 7.5 meters.
- 18 Meter square (6 Twin Cabins)
- Two (25 Meter square) Family Suites.
- The kitchen is 20 meters long, built of stainless steel, and fully functional for daily meals, including the bakery.
- Room for Employees (including a living room).
- Motor room: 10 Meter square with two generators, two water pumps, a multistage filter, a light bulb, water chlorination, and a chiller.
- The most distinctive feature of Eyaru is the sundeck.

Area of the Sun Deck:

- The deck's surface area is 210 meters.
- On bright and winter days, it might be completely uncovered or partially exposed from the top.
- There are four large heaters on the sundeck, and they use the heat that is radiated from the ceramic layer beneath the deck to power them.
- There are more sofas, chaise lounges, and futones here than there are people who can stay on Eyaru.

Areas for Bars and Restaurants:

- It's open seven days a week and used to serve breakfast, lunch, and supper.
- It might be partially or completely exposed from the top.
- Guests have the option of participating in live culinary demonstrations while vacationing.
- Cooking using real-time recipes is a lot of fun.
- We provide authentic Egyptian food so that you can have a taste of the real thing.
- The ingredients in all of the meals and beverages are of the highest quality.
- Every day, you will get a sneak peek at the menu from our in-house chef.
